

# Mark Vergel Banguis

## Full-stack Developer

 BanguisMV

 banguismv.dev@gmail.com

 Pyakz

 Surigao, Philippines

Experienced in **Full-stack Development** and offering skills **JavaScript** Technologies such as **React, Node, MongoDB, GraphQL** and some notable libraries needed

### EXPERIENCE

#### Software Engineer

*Cauld & Clark IT Solutions* 

Mar 2021 – Mar 2023

Remote, Philippines

- Worked on many projects including local and foreign such as (**Fiddle, Xendit**) and even internally.
- Developed several **web** and **mobile** applications using mainly **JavaScript** and it's related technologies and even a little bit of **Go**.
- Began as a **trainee** before being deployed on various projects, where I have been able to consistently deliver quality results.

#### Software Engineer

*Fiddle Inc* 

Nov 2021 – Dec 2022

Remote, USA

- Developed several features for the **mobile** and **web** application, using **React** and it's related technologies.
- Worked most of the time **fixing** bugs and **maintaining** code standards on several repositories.
- **Converted** large **JavaScript** codebases into **TypeScript** on a full-stack scale.
- Built several reusable components managed in **storybook** and published via **NPM** packages.
- Used **Kafka** for connecting and syncing related transactions in another **services**, such as emails, history, reports, sockets and etc.

#### Front-end Developer

*Xendit* 

Jul 2021 – Dec 2021

Remote, Philippines

- Built the front-end of a certain feature using **React**, and their custom UI library.
- Followed company's best practices for **testing** and maintaining code quality
- **Collaborated** with the senior developers for guidance in their large codebase.
